

SEVEN KILLED IN TWO RIOTS

TELLS EDITORS THEY MUST NOT SHIRK DUTIES

In Face of Oppressive Laws Mr. Forkner Points Independent Path

REVIEWS RISING COSTS

North Dakota Newspapers Should Advance Advertising and Circulation Rates

(Special to The Tribune.)
Fargo, N. D., Aug. 6.—The handicaps under which independent newspapers in North Dakota labor with oppressive legislation and rising costs will not keep independent editors from doing their duty toward their communities and the state at large, M. I. Forkner, of the Cavalier county Republican, president of the North Dakota Press Association, told the assembled editors here today.
He urged closer co-operation between members of the press association and an extension of its activities.
"If we had understood one another and understood one another's problems and duties to society a few years ago, as we understand them today, we might have prevented just the condition in North Dakota that we now are trying to remedy," he said. "If we had always fought as zealously for the right and stood together for it as we did in the recent primaries, without allowing our knees to weaken, it might never have been necessary for the people to pass a law to keep the red flag out of the state."
The editors were welcomed by Mayor Stern, of Fargo, and the response was made by G. W. Stewart, of Wilton, which were followed by the addresses of Mr. Forkner and Mr. Harrington.
Others on the program for this afternoon were George Farries, William C. D. Stiles, McKenzie; James Rockwell, Fargo; C. P. Anderson, Hatton; H. C. Hotelling, St. Paul.
This evening the past officers of the association will be guests of Past President Norman Black, of the Fargo Forum, at dinner. An address by James Schermerhorn, editor of the Detroit Times, is the feature of the night's meeting.
Mr. Forkner predicted that "we are about through with socialism as a controlling force in North Dakota's government. We are going to drive the money changers from the temple at the November election and our action is going to have a wonderful effect in the retarding of the progress of radicalism in America."
Mr. Forkner discussed the newspaper's snags and other rising costs facing newspapers. A questionnaire sent out early this year and from the replies it was learned that the publishers needed five times as much print as they had on hand to meet the current year's requirements; that very little had been ordered without being delivered and very little was in transit, he said. The price ranged from 5 to 13 cents.
Advertising too low.
"We found that the advertising in the state is altogether too low, considering the present cost of production," he said. He urged all newspapers in the state to immediately raise the rate for advertising by the national association, figured out by experts and based upon exhaustive investigation. He recommended that no weekly newspaper sell subscriptions at less than \$2.00 a year.
Mr. Forkner reviewed the passage of the Brinton newspaper grab bill and the fight made on the bill. It is doubtful if the bill is operative in North Dakota, he said, referring to the printed opinion of J. F. Sullivan, of Mandan.
"In many counties the boards of subdivisions have accepted Mr. Sullivan's opinion and are awarding their printing to independent newspaper," he said. "At least a few subsidized newspapers have been compelled to share with legitimate newspapers the patronage that was at one time legislated from them."
Against Free Publicity.
The president urged the employment of a paid secretary. "There are so many activities that a field secretary could direct, and there are so many ways in which he could be of assistance to members of this association that it is almost impossible to enumerate them," he said. He suggested that a paid secretary could aid in promoting efficiency within the association, and that the association should look after the interests of all the publishers.
"We are falling for altogether too much free publicity these days, when the world needs more good wholesome news and editorials of the ample, steady kind," he said, saying that a paid secretary could save his salary if he could prevail upon all editors and publishers to turn down "space spongers."
District meetings ought to be held by the association and the president suggested that "if conditions ever become normal in North Dakota, and the wheels of government run with less friction, let a school of practical printing at one or more places, and in each of our shops institute some practical scheme of making our work more attractive to apprentices."

MILDRED HARRIS

LOS ANGELES Mildred Harris Chaplin is the latest movie star to file for a divorce. She doesn't want the noted comedian to dispose of his property, either until the suit is settled. Chaplin is the third member of the so-called "Big Three"—Mary Pickford, Fairbanks and Chaplin—to get into the divorce court. After their divorces Mary and "Doug" married.

TELLS BRITAIN SOVIET DID NOT HALT ARMISTICE

Reply of Russian Government to British Note is Handed

Lloyd George

London, Aug. 6.—Leo O. Kamenetz, of the Russian Soviet delegation here, sent Premier Lloyd George last night a long communication giving the Soviet government's reply to Britain's note of Tuesday with regard to delay in the armistice negotiations between Poland and Bolshevik Russia.
O. Kamenetz's statement declares the Soviet government never desired to combine the negotiations for an armistice with negotiations for peace but that a demand of terms for armistice would prevent on the part of Poland to use the period of the armistice for a renewal of hostile acts.
The sole obstacle in the way of the ending of negotiations says the note is the absence of the Polish delegation whose return is being awaited by the emissaries of the Soviet government in order that negotiations may be immediately opened.

EXPECT AID OF TAFT IN LEAGUE EFFORTS OF COX

Democratic Presidential Candidate Plans to Make Several Speeches

Dayton, Aug. 6. Hope that former President Taft would aid toward electing a senate favoring the league of nations was expressed in a statement by Governor Cox, Democratic presidential nominee.
"We have every expectation," said the statement, "that Judge Taft will urge Republicans in any state where a primary contest is on for the nomination of a candidate for the United States senate, to support the man or men, who are in favor of the league of nations. By so doing, he can consistently remain a Republican in the face of his statement that the position of his presidential candidate on this question is wrong."
Governor Cox's statement was prompted by reports of success in the Missouri and Oklahoma Democratic senatorial primaries of pro-league candidates and by assurances of Democratic victory in New Hampshire, where he plans to make at least one speech late in August.

ASK PRESSURE BE REMOVED

Nashville, Aug. 6.—The Tennessee Constitutional League, with board of directors consisting of three Democrats and three Republicans today sent requests to Governor Cox and Senator Harding that political pressure on the Tennessee legislature be removed. The letter to Governor Cox was written by Judge Joseph C. Higgins, former member of the court of civil appeals, and that to Senator Harding by Judge G. N. Tillman who in 1902 polled the highest vote ever given a Republican candidate for governor of Tennessee.

POLES TIGHTEN LINES, RUSSIAN MARCH CHECKED

Military Observers Think Bolsheviks May Have Stopped for Supplies

AMERICAN AIRMEN MOVED

Kosciusko Squadron to Be Sent Into Most Critical Positions

Paris, Aug. 6.—Russian Bolshevik forces which have been attacking the Poles northeast of Warsaw to cut communication between that city and Danzig seem to have been checked for the time being by the desperate defense of the Polish army.
Dispatches here seem to indicate an improvement of the military situation in that sector of the front. Observers however, are inclined to look on the fighting near Brest-Litovsk with apprehension as the Bolsheviks have massed larger forces in an effort to break through. It is felt that the outcome of the battle now being waged in that region may decide the fate of Poland.
It is possible the apparent slowing down of the Soviet attack in the north however may be due to difficulties encountered in bringing food and supplies to the front over country roads believed to have been thoroughly wrecked by the Poles. If this is the case the Poles may be given only a brief breathing spell before another drive is started.

More Air Squadrons

Warsaw, Aug. 6. Owing to the desperate situation on the front near Warsaw the Kosciusko, the air force composed for the most part of Americans attached to the Polish army, is being transferred from the southern front. The squadron will aid in the defense of the Polish capital.

The American consulate in Warsaw will be closed Friday and Consul Franklin is making preparations to depart Friday night. Most of the records already have been shipped away.

The American legation here also is prepared to close within a very few days. The legation employees have shipped their baggage to Camp Grappe, the emergency headquarters of the American typhus expedition.

PIERCE LINES

Warsaw, Aug. 6. (By Associated Press.) The defensive line east of Warsaw has been pierced in several places according to word from the front. Preparations have been made for moving the government if the advance continues.
The officials however still hope the Soviet forces will be checked. No announcement has been made as to what place the government would move to but it is reported it would be Posen, or nearer the Silesian frontier.

Of the developments along the eastern defense line word from the front shows that after a halt of several days while reinforcements were brought up and the Bolsheviks forced crossings of the Bug at a number of places. Last night's announcement said that the Russians had forced the Bug about 70 miles east of the capital, this being a part of the Soviet movement to outflank the defenders of Warsaw and push on toward the Vistula.

The Poles' counter-attacks and fierce fighting is continuing.
The Soviet forces have been checked in their western push along the Prussian frontier.

SOVIET CLAIMS SUCCESS

London, Aug. 6.—The forcing of the western Bug, the occupation of Kovell and Lutsk, in Volhynia, and other advances by the Russian Soviet forces are announced in Thursday's official statement from Moscow received today.

CENSUS FIGURES ON N. D. TOWNS

Late North Dakota census figures follow: Denzoy 293, Kathryn 289, Leat 88, Litchville 328, Nome 267, Oriska 390, Pillsbury 142, Rogers 173, Sanborn 391, Wimbeldon 321, Inkster 348, Larimore 1089, Niagara 297, Northwood 925, Reynolds 289, Renville county 7778, Glenburn 288, Grand 112, Loraine 74, Mohall 861, Sherwood 423, Tolley 325.
Fossil turtles, ranging from 3,000,000 to 7,000,000 years in age, have been found in San Juan county, northern New Mexico.

WIRELESS TELEPHONES WILL BE INSTALLED ON PACIFIC COAST

San Francisco, Cal., Aug. 6.—Wireless telephone equipment that will enable persons on the Pacific Coast to speak with passengers and officials on vessels 500 miles at sea is to be installed soon on many ships in coastwise and trans-Pacific service, the Radio Corporation of America has announced.
Arrangements are already under way for the installation of the wireless telephone on the International Mercantile Marine fleet of the White Star, Red Star, Holland-American and American Lines," said Arthur Isbell,

PASSENGERS CAN'T BEAT FARE RISE BY BUYING TICKETS AHEAD

Round-trip Tickets Being Sold at Current Fares for Use Not Later Than August 26, According to Agents' Ward.

	Old Rate	New Rate
Bismarck to Valley City	\$4.43	\$5.30
Fargo	6.29	7.65
Dickinson	3.75	4.50
St. Paul	14.90	17.39
Seattle	47.13	56.58
Jamestown	3.30	3.96

If you have been planning on buying a few tickets, or script books before the new railroad rates go into effect, change your mind, because after the new rates go into effect tickets sold under the present traffics will not be good.

W. A. McDonald, passenger agent for the Northern Pacific received word today that the new rates would go into effect on Aug. 26 and "meanwhile tickets are to be sold at current fares, for use not later than midnight on Aug. 26."

Mr. McDonald states that a number of people have already asked if they could buy a few tickets now and save money when they used them after Aug. 26. The above communication answers this question and shows that the railroads are going to start to collect the full new rate, which is approximately 20 per cent higher than the present, immediately after it goes into effect Aug. 26.

JAMESTOWN DOES NOT TEMPORIZE WITH THE I. W. W.

Jamestown, N. D., Aug. 6.—There will be no temporizing with the I. W. W. in Jamestown.
Several farmers came to the city seeking harvest help and went to a pool hall frequented by transient labor. Chief berrmiller learned that two I. W. W. organizers were trying to dissuade and prevent six other men from accepting the offer of the farmers, which was 80 cents an hour, room and board, with no hours limitation.
The chief took them in charge and "entertained" them in the city jail. He found song books and regular I. W. W. literature on them.
The chief doesn't believe the agitators will bother again.

COX TO SPRING ONE SURPRISE IN HIS SPEECH

Foreign Office Issues Reply to Statement of Congressman Johnson

Dayton, O., Aug. 6.—Democratic clans were gathering here today for their great quadrennial event, the presentation tomorrow to the American electorates of a presidential nominee—Governor Cox, of Ohio. All was in readiness for the Governor's formal nomination of nomination by Senator Robinson, of Arkansas, who presided, over the San Francisco convention, and the candidate's address of acceptance, declaring the broad lines of the campaign.
With Governor Cox's acceptance address in type for tomorrow afternoon's newspapers, speculation increased to a point regarding the brief but important insert he has announced would be forthcoming tomorrow. The Governor continued to hold it a secret. Speculation on its message centered principally on three subjects, a possible challenge to Senator Harding, his Republican opponent for a joint debate on the league of nations; a specific statement on Article 10 of the league covenant or a definite announcement regarding a prohibition issue.
The full amount of the company's investment is not specifically set forth in the last statements. At the end of 1919, however, total assets amounted \$188,809,500 which may be considered an approximate value of working capital, plant investment, inventories, etc. In that year net profits amounted to \$21,011,761. Seven per cent of the aggregate assets would be \$13,220,865. Deducting this from the profits and taking 60 per cent of the proceeds there would be approximately \$4,675,000 to be divided among employees on the basis of 1919 income. The company employs about 40,000 workers when operating on a full schedule.
The stock reserve for the purpose consists of \$20,000,000 common and \$40,000,000 preferred. In order to provide for the compensation plan and for other purposes the stockholders increased the authorized preferred stock from \$60,000,000 to \$100,000,000 and the common from \$80,000,000 to \$130,000,000. The directors today will vote on a proposal to distribute \$10,000,000 common stock as a 12 1/2 per cent stock dividend.
The management proposes to pay out \$20,000,000 of the new common later on in semi-annual stock dividends of 2 per cent.
According to the plan the employees will be divided into two groups, those who are in executive and managerial positions and those who are not. The former will receive one-third of the extra compensation fund and the latter will receive two-thirds part in the company's 7 per cent preferred stock and part in cash. The funds will be distributed in proportion to the actual earnings of each employee for the year and the ratio it bears to the aggregate earnings of other employees in each group. Common stock will be distributed in stead of preferred to the employees in the first group.

ANTI-AMERICAN FEELING GROWS AMONG JAPANESE

Democratic Nominee Withholds "Important Insert" From Printed Address

Tokio, Aug. 6.—The statement of Congressman Albert Johnson at Tacoma, Washington, August 2 that thousands of Japanese are smuggled into the United States from Japan yearly is giving evidences of a tendency to increase the feeling with regard to the arrival of the recent American note and subsequent newspaper attacks.
"The Japanese government would gladly co-operate with the American government in exposing any such illicit and underground system as outlined by Congressman Johnson," a statement issued by the foreign office today.
It is hoped that Mr. Johnson will give the names of the bond associations or individuals concerned. All such information must be in the hands of Mr. Johnson who otherwise would not have made the statement.

HARVESTER MEN HERE TO SHARE FIRM EARNINGS

\$60,000,000 Voted for Distribution Among International Employees

STOCK GIVEN TO WORKERS

Employees of the Bismarck branch of the International Harvester Co. from the manager down to office boy, will in the future, have a share in the profits of the company, according to the decision of the stockholders. They voted to distribute 60 per cent of the net earnings, less 7 per cent on the capital invested, and set aside \$60,000,000 in stock to be divided among employees under an extra compensation plan open to all workers in this country and Canada.
About 35 to 40 men in this city will be benefited by this plan, which is without parallel in the annals of American business.
The program devised by the directors provides for special disbursements each year beginning Jan. 1, 1921, consisting of stock and cash. It is planned to divide annually an amount equal to 60 per cent of the company's net profits in excess of 7 per cent upon the corporation's invested capital.
The full amount of the company's investment is not specifically set forth in the last statements. At the end of 1919, however, total assets amounted \$188,809,500 which may be considered an approximate value of working capital, plant investment, inventories, etc. In that year net profits amounted to \$21,011,761. Seven per cent of the aggregate assets would be \$13,220,865. Deducting this from the profits and taking 60 per cent of the proceeds there would be approximately \$4,675,000 to be divided among employees on the basis of 1919 income. The company employs about 40,000 workers when operating on a full schedule.

The stock reserve for the purpose consists of \$20,000,000 common and \$40,000,000 preferred. In order to provide for the compensation plan and for other purposes the stockholders increased the authorized preferred stock from \$60,000,000 to \$100,000,000 and the common from \$80,000,000 to \$130,000,000. The directors today will vote on a proposal to distribute \$10,000,000 common stock as a 12 1/2 per cent stock dividend.
The management proposes to pay out \$20,000,000 of the new common later on in semi-annual stock dividends of 2 per cent.
According to the plan the employees will be divided into two groups, those who are in executive and managerial positions and those who are not. The former will receive one-third of the extra compensation fund and the latter will receive two-thirds part in the company's 7 per cent preferred stock and part in cash. The funds will be distributed in proportion to the actual earnings of each employee for the year and the ratio it bears to the aggregate earnings of other employees in each group. Common stock will be distributed in stead of preferred to the employees in the first group.

HUNGARY PEACE TREATY CALLED HARSH DOCUMENT

Chicago, Aug. 6.—A protest against the treaty with Hungary was sent to Secretary of State Colby today by Berthold Singer, Danish counsel here, and consul-general for Nicaragua, Costa Rica and Salvador.
In a 70-page communication Mr. Singer speaking "as an American to a fellow American" maintains the treaty is invalid under international law and "threatens extinction of an entire nation who must atone here for all the evil deeds committed by much stronger nations who have dominated her political life."

VOTERS DECIDE ON MEMORIAL

Carrollton, N. D., Aug. 6. The county commissioners of Carroll county have adopted a resolution placing the matter of erecting a memorial hall on the ballot for the fall election. The matter was started off by members of the local post of the American Legion.
The memorial hall is to be erected on the site of the old Carroll county jail, which was burned by fire in 1914. The hall is to be a two-story building, 100 feet long and 50 feet wide, and is to be dedicated to the memory of the men who died in the great war. The hall is to be a place where the people can go to learn the history of the war and the names of the men who died. The hall is to be a place where the people can go to learn the history of the war and the names of the men who died. The hall is to be a place where the people can go to learn the history of the war and the names of the men who died.

TROOPS RUSHED TO HALT RIOTS AGAINST ALIENS

Illinois Militiamen Put on Duty Following Outbreaks in Coal Mining Town

MURDERS CAUSE OF RIOTS

Mob Savage in Its Attacks and Foreigners Flee in All Directions

Springfield, Ill., Aug. 6. Five hundred more Illinois militiamen are to be sent to West Frankfort, Captain Frank Dickson announced this afternoon. He received word early this afternoon from Frankfort that the situation there is still threatening.

West Frankfort, Ill., Aug. 6. Following a night of rioting in which five persons are believed to have been killed and scores injured, comparative quiet was restored today. Approximately 5,000 foreigners against whom the rioters directed their attack had left town and this, coupled with the arrival of 150 militiamen of the 9th Illinois infantry, tended to bring about order.
A number of homes were burned and a pool hall wrecked. The mob at its height numbered about 4,000 men. Foreigners fled in all directions, taking with them articles of property they could with them. The rioting proper got under way shortly after 10 o'clock last night and continued to nearly day-break. At times the mob split up in sections and it was reported that some divisions of the mob drove foreigners into nearby wood. What followed could not be learned.
The trouble first started early yesterday after the finding of the bodies of Amiel Calcuttara, 19 years old and Tony Hemmel, 18, buried in shallow graves in the woods near here. The throats of both had been cut and a tramp had been shot.

The rioting started yesterday afternoon, according to the message, when two suspects were arrested in connection with the murder.
Talk With Prisoner
The mob hastily organized, stormed the jail, demanding the prisoners. When this was refused they demanded that a committee be allowed to talk to the prisoners. The authorities granted them this demand, and one of the prisoners, a chauffeur, is said to have declared that he drove Calcuttara and Hemmel to Royalton Monday in company with Settino De Sensis, who also is held in connection with the murder.
The committee then withdrew from the jail and the two prisoners were hastily removed by the authorities.
West Frankfort is in the southern Illinois coal region, and has been cut off from telephone communication for some time on account of labor trouble and only meager information was available.
The homes of about 50 foreigners were fired and the residents were chased and killed as they emerged from the burning buildings to escape death by incineration.
Troops arrived shortly before 9 o'clock this morning. The militiamen were under command of Major Satterfield, of Mount Vernon.
Kill Photographer
A photographer who attempted to take pictures of the riot in West Frankfort tonight was beaten to death by the mob, according to a message received at the Illinois Central offices here from the company's telegraph station at West Frankfort. This is the first death reported from the outbreak there.

SPEEDING UP COAL MOVEMENT

Washington, Aug. 6.—Speeding up of the coal movement to the north-west sufficiently to enable delivery of 200,000 tons by November was forecast today by officials of the Interstate Commerce Commission as a result of the return to normal working conditions of the bituminous mines in the central competitive field.
Billings, Mont., Aug. 6.—Simultaneously with the recent earthquake shocks in southern California, great crevices are appearing in the earth about 20 miles west of here. They are so serious, it is said, as to menace railway beds and it is possible may cause a new line to be laid.
It has been said for years that there was some connection between the structure of Montana and the California seismic belt and it has long been lay gossip that the keyways in Yellowstone Park, before and after pronounced shocks, show the effects of the disturbances. But there has been as far as is known, no scientific statement on the subject.
At State Capital
Jacob Krier, insurance man of Gladstone, N. D., was at the state capital yesterday afternoon on business.

EARTH CREVICES IN MONTANA ARE QUAKE AFTERMATH

Billings, Mont., Aug. 6.—Simultaneously with the recent earthquake shocks in southern California, great crevices are appearing in the earth about 20 miles west of here. They are so serious, it is said, as to menace railway beds and it is possible may cause a new line to be laid.
It has been said for years that there was some connection between the structure of Montana and the California seismic belt and it has long been lay gossip that the keyways in Yellowstone Park, before and after pronounced shocks, show the effects of the disturbances. But there has been as far as is known, no scientific statement on the subject.

CALL CITIZENS TO ARMS AFTER DENVER RIOTING

Mayor Issued Proclamation, Following Outbreak of Mob Result of Strike

NEW OUTBREAKS FEARED

Denver Post, Which Opposed Street Car Strike, Is Attacked by Mob

Denver, Aug. 6.—Mayor Bailey this afternoon issued a proclamation ordering that all theatres in Denver close at seven o'clock to night. The police department has requested that all citizens remain in their homes this evening.

Denver, Aug. 6.—Fear that rioting by street car strikers, their sympathizers and strikebreakers, which last night resulted in the death of two and injury of 34 persons, would be resumed, was expressed in official circles today.

Citizens today were responding to a proclamation issued by Mayor Bailey calling for 2,000 volunteers for patrol duty. The police were helpless last night before the mob which proceeded on its journey of destruction until it tired itself out.

Injured Making Progress
Reports from hospitals today indicated the injured were making progress and most of them probably will recover. No attempts had been made up to 10 o'clock this morning to operate cars. Yesterday was the first day since Sunday, when the men struck for higher wages, that the tramway company was able to operate cars, which were manned by strike breakers.

Owners of the Denver Post, which opposed the strike, said today he could not estimate the damage done by the mob to the post plant. The Post was issued as usual from its own plant today. Armed strikebreakers at the south Denver car barns today were patrolling the yard in front of the barns. One hundred and fifty strikebreakers were housed in these barns which the mob fired last night. The two fatalities occurred in this rioting.

HARDING WILL STICK TO HIS FRONT PORCH

Three Outside Speeches All That Are on His Program, Says Senator New

Chicago, Aug. 6. One speech in New York, probably another in Chicago and possibly a third at Denver or some other western city that is expected to be the extent of Senator Warren G. Harding's speaking engagements away from home, as outlined by Senator Harry S. New, of Indiana, chairman of the Republican speaker's committee.

Senator New declared there was no possibility of Senator Harding abandoning his front porch campaign for a "barn-storming, tail-end-special speaking trip."

Senator New also announced that with the exception of Maine, where the general elections are to be held September 13, the speaker's campaign would not start in earnest before the middle of September.

The invitation to present the Republican reviews on the league of nations in a joint debate at Winona Lake, Ind., August 9, has been accepted, he said, and Governor E. P. Morrow of Kentucky selected as the Republican speaker.

Senator Gilbert M. Hitchcock has already been nominated to represent the Democrats.

CROSS NATION IN SIX DAYS

Los Angeles, Aug. 6. "Cannon Ball" Baker arrived here in an automobile that he had driven from New York City in six days, 17 hours and 36 minutes, breaking his own transcontinental record of seven days, 11 hours and 52 minutes. The distance traveled was 3,376 miles. The trip was made under the auspices of the United States army recruiting service.

ILLINOIS MAYOR CAUGHT IN RAID

Chicago, Aug. 6. A squad of 25 government agents acting under orders from Maj. A. V. Chalmers, prohibition enforcement director, raided eight saloons in Lemont, Ill., and arrested Mayor Harvard S. New six other saloonkeepers and a bartender on federal warrants. The prisoners were brought to Chicago and probably will be arraigned tomorrow. Officials said 75 gallons of liquor were seized.

ARMY TREATMENT OF TUBERCULOSIS

Some 5,000 Soldiers Admitted to Hospital at Otten, N. C., in 22 Months.

DISEASE ARRESTED IN 3,000

Quiescent in 1,000 Cases, 500 Under Treatment, While 300 Have Died—Most Efficient Modern Methods Employed.

Washington—Among the vast enterprises which have engaged the attention of our government during the last few years the physical reconstruction of our soldiers who saw service abroad ranks among the first. And among those who needed the closest care and attention were service men who fell a prey to tuberculosis.

These victims of the dreaded white plague have been treated by the most efficient modern methods in the great army hospitals which arose as if by magic in different parts of the country. The work has been carried on unostentatiously, and but little knowledge of it has come to the attention of the public.

The physical health of the men taken into the service had to be generally excellent, as is quite well understood, otherwise the medical examiners would be obliged to reject volunteer or draftee.

Notwithstanding all the care taken to select none but sound men, the influenza epidemic resulted in the development of tuberculosis in a great many of our soldiers, as the secondary result of this acute infection.

In addition, many soldiers who had been given readily became victims of the disease. Moreover, the constant damp and rainy weather in France would often result in the development of pneumonia, another ready factor in activating tuberculosis.

While a few men got into the army who already had small tubercular lesions, these were so slight as to be passed or overlooked by the examiners. However, when such men were unduly exposed and subjected to the severe physical work incident to army service a break in the normal state of health resulted.

It was from these sources, therefore, that the great majority of the tubercular patients in the army were recruited. Indeed, many thousands of soldiers required treatment.

Provision for their care was made at Ottenville, N. Y.; Denver, Colo.; Fort Bayard, N. M., and Otten, N. C.; besides several smaller posts that have since been abandoned entirely or turned over to the department of public health.

Two Main Hospitals.

The main army hospitals for the treatment of tuberculosis at present are at Denver and Otten. United States General Hospital No. 18 is the one at Otten, which is near Asheville. It has established a splendid record and will serve best as an example in giving a brief outline of the treatment of tuberculosis as it is carried out in the army.

No. 18 is a hospital conducted on a truly gigantic scale. It is a town in itself, consisting of more than one hundred buildings which cover 340 acres of land. The money outlay was \$3,500,000. No. 18 has its own water supply and sewerage system. The grounds at night are lighted by electricity, and are intersected by concrete and macadamized roads. There are two central heating plants for the hospital.

The buildings are of wood and painted. The unit ward system was used in construction, which permits the very sick to be quarantined away from those only slightly affected, and also permits of more individual care where there are only a few patients in each building.

More than 1,400 beds were available in this institution for the treatment of tuberculosis.

The surgeon general's office has taken great pride in this hospital and has been most energetic in the endeavor to have everything at the top notch of efficiency. The success achieved has amply demonstrated what can be done by skill and devotion.

When the hospital was built in the fall of 1917 a Western specialist in tuberculosis was installed. He retired and returned to private work, and was succeeded by Col. William C. Lyster, a regular army man of more than twenty years' service. He had held very responsible posts in England and France and had been decorated by King George with the Order of St. Michael and St. George. Prior to the war he was known to army men as the inventor of the Lyster water bag for the use of troops in the field, which is always used when fresh water is unobtainable.

Many difficulties in the way of providing an ideal treatment for the tubercular were encountered at first. One of the most apparent was the amount of money allowed for the daily ration. The war department allowed but 64 cents, an amount experts say is totally inadequate to provide the proper kind and quality of food required by tubercular patients. It is to be remembered, of course, that proper feeding is one of the mainstays of treatment in this disease.

Not Enough Money for Food.

Colonel Lyster's representations to the war department resulted in ten

porarily raising the ration money from 64 cents to \$1, but this was reduced later to 88 cents.

The method of treatment followed at Otten is that advocated by Colonel Bushnell, a contemporary of the late Dr. Edward Trudeau of Saranac Lake, N. Y. The course is subdivided thus: Complete rest in bed, partial rest in bed, and rest by every patient from 1 to 3 in the afternoon. In addition, the patients get good wholesome food and plenty of fresh air.

Serums and vaccines are not employed. Artificial pneumothorax (that is, cutting into the pleural cavity so that air can enter and exert pressure on the lung) is only resorted to in cases of severe, continued hemoptorrhage.

The bed linen is changed daily to prevent reinfection; the sputum cups are changed twice daily, and everyone must have lights out by 10 p. m.

The X-ray diagnostic laboratory is one of the best in the country. Maj. John McKee, who has a fine reputation in this field, is radiologist. Each patient is radiographed upon admission and again every month or two to note improvement or retrogression. There is also an excellent chemical laboratory.

Four dental surgeons are constantly busy seeing to it that the teeth of the patients are kept in good condition.

The hospital buildings and grounds are kept spotlessly clean, and the evidences of perfect sanitation are observable everywhere.

Colonel Lyster had the officers' ward turned over to the very sick enlisted men, all bed patients. There were about seventy of these. Such patients are provided with everything the market affords, and they can order anything they wish. There are two dietitians constantly in attendance to provide food for them. There are also four ward surgeons to attend to them; in fact, nothing is overlooked that could add to their comfort.

In the officers' infirmary ward about thirty officers who are gravely ill are quarantined, most of whom are bed cases. Contrary to what one would naturally expect, these men, seriously ill, joke with each other all day long.

A most remarkable fact is the spirit of cheerfulness that pervades the hospital, especially in the wards mentioned.

How Officers Pass the Time.

Some of these officers are incensed in plaster casts on account of spinal trouble. All are engaged in something to help pass the time: they make baskets, knit scarves, paint pictures, carve wood or make dolls.

The cheerfulness of one officer, a man of Irish birth, was noticeable. He was near death for many months, but he never gave up hope, although he would become delirious every night. Finally, he took a turn for the better, and now he is up and out of bed and has gained in weight from 92 pounds to 121 pounds. He is so overjoyed at "coming back" that he keeps the whole ward in an uproar of mirth by his witty sallies. Many others have regained their health or are on the road to it.

Another factor that has much to do with keeping up the spirits and high morale of the patients is the genuine interest in them manifested by the nurses. They never grumble, are always at the call of the patients, and always appear to be happy. The spirit of good cheer manifested by Miss Sheehan, the chief nurse, seems to be contagious and to have imbued itself into those who work under her. Miss Sheehan had the same reputation of being able to get work done cheerfully in the largest base center at Vichy, France.

Again, many pleasant ways of keeping occupied are provided by the government. About one hundred reconstruction aids help the soldiers in all kinds of instruction, such as basket-weaving, languages, typesetting, printing, chemistry, etc.

The Red Cross has a large building where moving pictures are given daily, and where a social meeting place is provided for those on the road to recovery.

The hostess house, run by the government, provides rooms at nominal cost for the women relatives of the patients, and furthermore is active in a social way.

Then the residents of Asheville have been enthusiastically hospitable, constantly entertaining the patients who are able to be about and carrying candy and all sorts of good things to the hospital every day.

Such is the manner of life at general hospital 18.

Now that the war risk insurance bureau and the public health service are gradually taking over the patients needing further treatment, ample provision is made for their care. Those requiring such treatment will receive \$80 a month instead of \$30.

Some hardship is caused in the case of reserve or temporary officers requiring further treatment. They are obliged to submit to a curtailment in pay, while the regular army officer is either kept on in the hospital or retired on three-quarters pay.

The enlisted man, however, is greatly benefited by the provisions of the war risk bureau. Those totally and permanently disabled receive \$157.50 a month.

As an instance of the real results obtained at Otten it may be said that 5,000 soldiers have been admitted to the hospital. All of these did not have tuberculosis and a few were transferred to other hospitals. Yet during the year and ten months of its usefulness more than 3,000 cases of tuberculosis have been treated and nearly 2,000 have been returned to painful occupations. In about 1,000 cases the disease has been arrested; in 1,000 it is quiescent; about 300 have died and 600 are still undergoing treatment.

The energy exerted by Babe Ruth in hitting a home run is said to equal 44 horsepower.

The cost of collecting the internal revenue taxes approximate 55 cents for each \$100.

FAMOUS DANISH ARTIST PORTRAYS ANGUISH OF RUSSIA IN PRESENT TRIAL

By MILTON BRONNER, European Manager N. E. A.

London, Aug. 5.—Anxious to see what Bolshevik Russia is really like, London has been flocking to the exhibition of paintings by the famous Danish artist, Edward Saltoft, who

was chief of the Danish Red Cross in Petrograd from 1916 to 1919.

Saltoft told me: "The Russia you see in my paintings and drawings is a Russia of tears, of pain, of hunger, of sorrow and of anguish. That is the kind of land Russia is. It was so under the czars; it was so under Ker-

ensky, and it is so under the Bolshevik regime."

Photos of two Saltoft paintings, printed by courtesy of Ernest Brown and Phillips of the Leicester Art Gallery, London, portray: Left—A Prison Scene. Right—The Cry of the Revolution. Inset is Saltoft.

of Mr Dupuis that the burden on various classes of freight will be equalized. Several months may be consumed in the adjustment of the rates on various classes of freight.

The same applies to North Dakota, according to the commissioner. If a commensurate increase is granted by the state commission, there will be a period of adjustment of states on various classes of freight in the state.

May Lessen Effect "The equalization process will remove to some extent the harsh effect of the big increase in freight rates," said Mr. Dupuis, "and will permit the absorption of the amount by the classes which are best able to stand the increase."

The state commissions will exercise their authority in the equalization process, according to Mr. Dupuis. To refuse to obey the mandate of the Esch-Cummings transportation act would amount to a surrender of the authority of the commissions, he added.

In Senate Chamber The hearing to be held before the state commission on August 12 will be conducted in the state senate chamber at the capitol. Notices have been mailed to many shippers so that they may be represented at the hearing.

"The commission will sit in a judicial capacity," said Mr. Dupuis, "and the shippers, the public and the railroad should be present to explain their contentions."

SMITH IS SENT UP FOR 4 YEARS

James R. Smith was arrested some time ago charged with criminal assault and theft of an automobile, lead to the arrest of the young man.

The case came before Judge W. L. Nussle in district court yesterday afternoon. Smith pleaded guilty and the judge sentenced him to four years of hard labor in the state penitentiary.

Smith claims to be an automobile mechanic and had taken a car from this city and "eloped" with a young woman, who was only 13 years of age. The car was apprehended near Dickinson and Smith arrested.

In making the sentence, Judge Nussle stated that it appeared as though the prisoner was below the average mentally, which might account for his criminal acts.

Rats in the United States destroy \$200,000,000 worth of property annually.

FOOD IMPORTS SHOW INCREASE OVER LAST YEAR

Washington, Aug. 5.—Imports of foodstuffs into the United States during the fiscal year just ended increased by more than \$680,000,000 over 1919, while exports of foodstuffs in 1920 show a decrease of more than \$360,000,000, according to foreign trade figures issued today by the Department of Commerce.

Foodstuffs imported during 1920 totaled \$1,513,776,309, compared with \$632,422,491 in 1919. Exports of the same commodities in 1920 amounted to \$2,141,193,130 as against \$2,502,852,400 during 1919.

Crude materials for use in manufacturing imported in 1920 totaled \$2,141,644,621, compared with \$1,250,674,773 in 1919 and exports amounted to \$1,968,118,412 in 1920 against \$1,228,395,137 in 1919.

Exports of manufacturers ready for consumption during 1920 amounted to \$2,839,999,005 and imports totaled \$145,125,689.

Exports of manufacturers for further use in manufacturing amounted to \$991,920,623 during 1920 and imports totaled \$800,713,283.

MARKETS

CHICAGO LIVESTOCK

ONE-HALF MILLION

AMERICA MAKES BIG DISKS NOW

Lens Manufacturers Solve Difficult Problem With the Aid of Scientists.

CATCHING UP WITH GERMANY

All Mechanical Difficulties in Making of Large Telescopic Disks Have Been Overcome—Process Is Delicate One.

New York—Large telescope disks are being made in the United States. All mechanical difficulties have been overcome, according to an announcement made by Dr. George W. Morey, a member of the American Chemical Society.

This remarkable achievement is due to preparation and handling of the ingredients required for pure and flawless glass and is the result of experiments begun at the outbreak of the world war, under the auspices of the geophysical laboratory of the Carnegie Institution in Washington.

Catching Up With Germany.

Before 1914 practically all the optical glass in the United States was imported from Germany. When the United States entered the war the field glasses, range finders, telescopes and other instruments of precision used by her army and navy were equipped with lenses fashioned by hand. Private citizens even loaned or contributed opera glasses and binoculars to the fighting forces. Optical glass of fine quality, however, is now to be had on this side of the water. The climax of this achievement of industrial chemistry has been reached by American makers in the manufacture of lenses for telescopes. At first disks which strengthened our view were made three or four inches in diameter. Recently a special four and three quarter inch lens was ground for Lowell observatory at Flagstaff, Ariz.

The first nine and one-half inch disk was turned out last December. Six others have since been made and delivered. As their diameters increase disks are made with greater difficulty. Finally, on February 15, 1920, the first perfect 12-inch disk was furnished and a large optical glass corporation now lists this size for short-time delivery.

Making Larger Disks.

The next size attempted was a 20-inch disk. In the manufacture of which the problem was still more complex. Several flawless ones were produced but they cracked in the annealing process. American ingenuity was brought into play to devise a means of slowly cooling these immense plates of glass, so that they might be free from the strain so likely to destroy them. Experiments by scientists of the geophysical laboratory showed exactly how slowly their temperatures must be lowered, and the cooling schedule outlined was closely followed. Owing, however, to the extreme cold weather of last March and the shortage of gas, this schedule could not be followed. One splendid disk strained and broke just when nearly ready to be taken from the oven.

Equipment hitherto used was then scrapped and an electric furnace was specially designed to meet the needs of the problem by experts of an electric company. This device is thoroughly insulated and provided with an automatic appliance which will hold the temperature absolutely constant to a fraction of a degree while the glass is being treated to remove strain. The temperature can be dropped a few degrees a week.

With the aid of this furnace now in process of construction it is believed that the last difficulty in the way of the American manufacture of the largest disks will be overcome. Orders have already been accepted for the production of several large guaranteed disks, including one pair of the 18-inch size for refracting telescopes, and a 36-inch disk for a reflecting telescope. The furnace will receive the 40-inch size. When that goal has been reached, the company will continue the development, so that eventually the largest and finest disks in the world will be American made.

Total of \$223,384,769 Paid to Former Soldiers

Announcement has been made by the bureau of war risk insurance that aggregate payments on awards of compensation and of insurance to former service men and their beneficiaries total \$223,384,769.72.

A recent compilation of compensation payments showed payments on account of death of \$15,814,735.08, and for disability of \$84,527,403.20.

Chance to Pad Census Returns. Cincinnati, O.—If this city doesn't get a move on there'll be more rats here than citizens, for according to estimates of the United States public health authorities there are 400,000 rodents here doing over a half million dollars' damage yearly. If Cincinnati would count all her rats as citizens the town would keep pace with some other cities which have shown large census gains.

Nowhere in America has there been such a diversity of Indian languages as in California.

Carbonium the artificial substitute for emery is said to rival the diamond in hardness.

COX'S BROTHER "JERKS" SODAS

Dayton, O.—William Cox, brother of James M. Cox, Democratic candidate for president, is shown here at work behind the soda fountain in his store in Dayton. And if Brother Jim is elected president he'll keep on working in the store, he says.

NAUGHTON MAN'S FUNERAL HELD THURSDAY P. M.

Funeral services were held yesterday afternoon for John A. Naughton, 70 year old pioneer settler in Naughton township. Mr. Naughton's death Wednesday came after a few months suffering from Bright's disease, accompanied by old age.

He is survived by his wife, three daughters and a son. The daughters are Mrs. C. A. Naughton, of Naughton township; Mrs. E. A. Trye, of Trye township; and Mrs. Louis Skasheim, of California. The son, Alfred, resides in Naughton township. Mr. Naughton came to this country from Sweden, in 1883, settling on a homestead in Bagley county, where he has since lived.

Mr. Naughton was a respected citizen and stood high in his community. The funeral services were conducted by Rev. Stanley of Fargo, at 2 p. m. Thursday at the Naughton school house. Burial was in the Naughton cemetery.

Hot Days Trying On Elderly Folks

Sluggish, languid, constipated feeling is quickly removed by Dr. Caldwell's Syrup Pepsin

DR. W. B. CALDWELL In his 82nd year

THOSE who are past the prime of life know the discomforts of hot weather. Exercise is tiring, and constant sitting around brings constipation. It is especially dangerous for elderly people to allow constipation to continue for it creates poisons in the system that may bring on a serious illness.

If you pass a single day without full and free elimination, so to say, thousands of elderly folks go and once take a teaspoonful of Dr. Caldwell's Syrup Pepsin, and you will find prompt relief. It is only by doing this that you can be sure of feeling well. You must not trust constipation to correct itself.

Dr. Caldwell's Syrup Pepsin is particularly suited to elderly people as it is a combination of simple laxative herbs with potent acids gently and without any harshness. Unlike so many medicines, it can be used exclusively without loss.

ing its effect, and it does not weaken. Mr. Levi North, of Antwerp, N. Y., who Dr. Caldwell himself is in his 82nd year, and he has used only Syrup Pepsin for the last ten years. He is well and hearty, never has constipation, an ache or pain. No person of advancing years should be without Dr. Caldwell's Syrup Pepsin these summer days. Any druggist will sell it to you. It is economical.

Millions of people of all ages suffer from occasional or chronic constipation. Let them send name and address to Dr. W. B. Caldwell, 512 Washington Street, Monticello, Ill., for a free sample bottle of his wonderful Syrup Pepsin. 8 million bottles were bought at drug stores last year, the largest sale in the world.

CONTRACTOR MAKES ALL FACTS PUBLIC

Troubles of Ten Years' Stand- ing Gone—He Feels Like a New Man Since Taking Tan- lac.

"Tanlac has put an end to troubles that had been pulling me down for ten years, and I am now a well man and feeling as spry as a boy," was the statement made a few days ago by Axel Elogren, of St. Paul Park, St. Paul Minn. Mr. Elogren is a painting contractor and has lived in St. Paul Park for the past twenty-nine years.

"My troubles started in 1910 and ever since I have been gradually getting worse. My kidneys were all out of order and I had a continual pain across the small of my back, which sometimes felt like it would break in two. I had a bad case of indigestion, a poor appetite and suffered every time I ate anything. Gas would form on my stomach and fill me up so I had to fight to get my breath. At night I often suffered with my stomach. I would get up and pace the floor, trying to get easy. My nerves were on edge all the time and I was subject to severe, dizzy headaches. I was weak and all run-down and almost unable to work and just seemed to have played out altogether."

"But now I don't feel like the same person. In fact I am a different man because of the way Tanlac has fixed me up. My kidneys are in the finest kind of shape and my back never hurts me at all. My digestion was never better and I have a ravenous appetite and enjoy everything I eat. My nerves are as steady as a rock and I am entirely rid of those dizzy headaches. I go to sleep as soon as I hit the bed and get up in the morning feeling fine and ready for work. I am in tip-top shape and feel stronger than I have in many years."

Tanlac is sold in Bismarck by Jos. Breslow, in Dracoll by N. D. and J. H. Barrette, in Wing by H. P. Hoeman, and in Strasburg by Strasburg Drug Co. —advr.

CITY NEWS

Here on Business
Neil Reed drove up from Williston yesterday on business.

Steele Woman Here
Dorothy Steele and Helen Jones, of Steele, were in the city yesterday.

Visits Here
George J. Schneider and Carl Severson, of Robinson, were in the city yesterday.

Young at St. Paul
Atty. C. L. Young is in St. Paul on business. He expects to return on Monday.

Back from Mandan
Mrs. E. M. Kaffer, who has been visiting in Mandan the past week, returned to her home here yesterday.

Baby Boy
A baby boy was born to Mr. and Mrs. E. H. Weber, 824 Seventh street, at St. Alexis hospital this morning.

Visits at Lucas Home
Miss Dorothy Dreesch and her brother Kenneth Dreesch are visiting Helen Lucas for a few weeks.

Rawlings Off to Lakes
Dr. and Mrs. G. A. Rawlings left for the lake region this week. They will make the trip by motor car.

Two Pay Fines
Sammy Polli and Peter Anton were both brought into police court last night and given a fine of costs apiece for speeding.

Married Last Night
Joseph F. Fetting, of Orrin, Pierce county, and Miss Theresa Mosser, who has been employed in this city, were married last evening. They left in

"DANDERINE"

**Stops Hair Coming Out;
Doubles Its Beauty.**

A few cents buys "Danderine." After an application of "Danderine" you can not find a fallen hair or any dandruff besides every hair shows new life, vigor, brightness, more color and thickness.

CHIC FROCK OF SUEDE CLOTH EASILY COPIED

BY CORA MOORE.

New York's Fashion Authority.

New York, Aug. 5.—Straight from Paris came this autumn frock of dull red suede cloth and tarnished silver braid, in which a Paramount star posed. It would be not at all difficult to copy at home, so it is particularly practical especially for the girl who is going ready her fall outfit.

There is, first, a plain skirt, gathered all round and mounted on a band of brassiere. Then a straight section is banded with the tarnished silver braid and, gathered scantily, is attached to the skirt at the hip line. A back panel hung from the belt, falls over it at the back.

The blouse, cut kimono-wise with shoulder sleeves is quite plain save for a collar and sleeves ruffled at the wrist and a band of the silver braid covering the belt. It is youthful, simple and charming.

MARRYING OFF WHOLE FAMILY PROVES JOB

The job of marrying off two sisters and an elderly aunt so that the brother of the girls may be free to wed the woman to whom he has been engaged six years is some job, but it was undertaken by Babs Hardcastle, played by Constance Talmadge in "The Love Expert," the original Emerson Loos photoplay, which will be seen at the Little Theatre tonight. Babs was successful in finding mates for the two sisters and compromising her father into marrying the elderly aunt but she received a temporary setback in the case of the brother Jim Wuthrop when his fiancée suddenly was wedded to a

Beatty, Master Edmund Schreiner, of Underwood; Mrs. J. J. Decker, of Dickinson; Will Ham (C. Roylance); Mrs. E. E. Foster, Beulah; and Miss Ruth Wright, of Hazelton, have been discharged from St. Alexis hospital. Miss Velma Hoegler, of Olevis S. D.; and Mrs. Rev. William Butschat, of Lehr, have entered the Bismarck hospital. Mrs. Hast and baby girl, of Beach; Mrs. Winstein and baby, Mrs. Lee and baby girl, of Washburn; Mrs. P. Mosbrucker and baby, and Mrs. J. W. Wilson and baby, have been discharged from the Bismarck hospital.

PEOPLE'S FORUM

Editor The Tribune:

The following is one man's idea

of the "easy life" of a policeman

If he's neat—he's concealed

If he's careless—he's a bum.

If he's pleasant—he's a flirt.

If he's brief—he's a grouch

If he hurries—he overlooks things

If he takes his time—he's lazy

If he's deliberate—he's too slow to

catch cold

If you strike him—he's a coward

If he strikes you back—he's a bul

ly

If he outwits you—he's a sneak

If you see him first—he's a bone

head.

If he misses it—he's a simp

If he gets promoted—he's got a

pull

If he don't—Oh, what's the use

—A friend of the Police

St. Mary Sewing Circle Lad-

ies will hold a food sale on

Saturday afternoon at the Gas

Company's office. They will also

offer a good selection of bun-

galow aprons in different styles

and sizes.

FRECKLES

**Now Is the Time to Get Rid of
These Ugly Spots**

There's no longer the slightest need of feeling ashamed of your freckles, as Othine—double strength—is guaranteed to remove these homely spots. Simply get a tube of Othine—double strength—from any druggist and apply a little of it at night and morning and you should soon see that even the worst freckles have begun to disappear, while the lighter ones have vanished entirely. It is seldom that more than an ounce is needed to completely clear the skin and gain a beautiful clear complexion.

Be sure to ask for the double strength Othine as this is sold under guarantee of money back if it fails to remove freckles.

THE STATE'S OLDEST NEWSPAPER
(Established 1878)

WHO'S WHO

It takes 3302 pages to recite the virtues of the 23,443 people biographed in this American biennial publication. Who's Who. The men and women included because "of special prominence in creditable lines of effort," undoubtedly were rightly chosen.

But—so it seems—so many, so very many, were left out. One would like to see some day a Who's Who containing the names of a lot of people who are doing a great share of the world's work, heroes and heroines in all lines of human endeavor who as yet have never had a chance at a "look in" in anybody's Who's Who.

Take soldiers, crippled for life, who, after reconstruction, are making good in a thousand different lines; take mothers, who gave their sons in war; take the plain patient strugglers, who, work as they may, for some reason or other, get nowhere except a day by day living; take men and women—a hundred of whom everybody knows—such a compilation would be a real Who's Who, with a human appeal greater than fine gold.

After all, it is just ordinary, common people who get the work of the world done.

SOUTH AMERICA

North American customs are reversed in parts of South America.

In one district umbrellas are used only to keep off the sun. When the owner of an umbrella is caught out in the rain with it he folds the umbrella up carefully to keep it from getting wet!

Consider the La Paz district of Bolivia! There the more skirts a woman wears the greater her social distinction.

The Argentine once had a frontier life no less picturesque than that of the United States.

South America has many varied points of interest. But nothing there is of more interest than the rapid growth recently of its trade with the United States.

For instance, Uruguay.

Only three vessels flying the flag of the United States entered the port of Montevideo in 1914.

Last year there were 154. Already this year the number is 103.

A new Trans-Andean railway is being considered by the government of Chili and Argentina. It would connect northern Chili with Buenos Aires and would reduce by ten days the time of shipment of American goods to interior Argentina by way of the Panama Canal. The cost of this railroad would be \$25,000,000.

DELBRUCK ON LUDENDORFF

Hans Delbruck, long professor of history at the University of Berlin, the author of big books on Frederick the Great, Napoleon, Gneisenau, Moltke and others, and the editor of the Preussische Jahrbucher, has come out in this virile monthly with a study of Ludendorff in which the point is made that though he had the instincts of a soldier, his strategy and policies were as impotent as those of a blindfolded child. Delbruck charges Ludendorff with selfcontradiction, dishonesty, vanity and lack of ability. He says:

"Ludendorff refused to allow the chancellor to direct the policy of the war. When to do so would have meant a loss to the influence of the high command, and refused to take the responsibility when a military loss was well nigh inevitable. He claimed to be interested in a peace of reconciliation and when the opportunity was given him he hurled our troops into certain death and conducted the war in a way that filled America and Europe with horror. Our peace proposals of 1916 and 1917 were declined, not because they revealed our weakness, but because, as Ludendorff knows and must confess, they carried in them the impression of utter insincerity. The fate of Germany was sealed the day he was assigned to the general staff. And, worst of all, he was so thoroughly incompetent that the heroism our soldiers did display under him as a leader must perforce pass for nought."

PRESIDENTS' RELIGION

When the electors of this country awoke on the morning of November 3 they will find that they have chosen as the nation's chief a man of religious belief none of whom have previously occupied that place.

A search shows that never has a Baptist been president, and Warren Gamaliel Harding is one. Nor has a member of the United Brethren church been chosen—and James Middleton Cox is that, although he attends the Episcopal church, of which Mrs. Cox is a communicant.

George Washington was an Episcopalian; John Adams, Unitarian; Thomas Jefferson, Liberal;

James Madison, Episcopalian; James Monroe, Episcopalian; John Quincy Adams, Unitarian; Andrew Jackson, Presbyterian; Martin Van Buren, Reformed Dutch; William H. Harrison, Episcopalian; James K. Polk, Presbyterian; Zachary Taylor, Episcopalian; Millard Fillmore, Unitarian; Franklin Pierce, Episcopalian; James Buchanan, Presbyterian; Abraham Lincoln, Presbyterian; Andrew Johnson, Methodist; U. S. Grant, Methodist; Rutherford B. Hayes, Methodist; James A. Garfield, Disciples; Chester A. Arthur, Episcopalian; Grover Cleveland, Presbyterian; Benjamin Harrison, Presbyterian; William McKinley, Methodist; Theodore Roosevelt, Reformed Dutch; William H. Taft, Unitarian, and Woodrow Wilson is a Presbyterian.

Eight Episcopalians, seven Presbyterians, four Methodists, four Unitarians, with the rest "scattering" is the record. And the next president will be none of these. The first United Brethren or the first Baptist is to be chosen.

The America Cup might easily be designated as Lipton's Tease.

What has become of those Swiss yodlers who used to travel on the same circuit as Bryan?

The Irish are using bombing planes against the British. Another development in Erinautics.

A Detroit bellboy was shot by a tourist from Texas. Perhaps the youth sneered at a ten-cent tip.

Pilsner fans will not be misled by the news that the dry candidate comes from Germantown, Ohio.

A calf would get mighty conceited if he could read in the papers what folks are paying for shoes.

It would be interesting if Shamrock and Resolute exchanged crews and raced for the cup all over again.

An Evansville, Ind., airplane wreck was caused by a frightened passenger grabbing the steering wheel. Years ago people used to cause automobile accidents, the same way. And before that, they grabbed the lines when buggy riding.

EDITORIAL REVIEW

Comments reproduced in this column may or may not express the opinions of The Tribune. They are presented here in order that our readers may have both sides of important issues which are being discussed in the press of the day.

BACK TO COMMON SENSE—THE STATE-WIDE PRIMARY MUST GO

More important than the nomination or designation or recommendation of any candidate for any state office is the unqualified declaration of the Republican party of the Empire state in favor of the selection of candidates by the old convention system. The language of the Saratoga platform is perfectly clear:

"The direct primary principle can well be applied in the smaller units and in the choice of delegates. But a state-wide primary not only does not insure an expression of the will of the majority, but by its cumbersome and expensive machinery often thwarts it."

This is not political retrogression. It is a return to political common sense; and the "designated" candidate of the "unofficial" convention goes to the primaries this year carrying a party mandate for the dissolution of this cumbersome mechanism of force and futility.—New York Sun and Herald.

NOW LISTEN TO THE "MARTYRS"

A. C. Townley, president of the Nonpartisan league, and Joseph Gilbert, former organization manager, have been denied a new trial in their case before Judge Dean of Jackson county. The only conclusion to be deduced from the conduct of their representatives in the trial is that the denial, from their point of view, was a consummation devoutly to be wished. Their attitude is well epitomized in these words from the memorandum of Judge Dean:

"That drastic measures were purposely invited and desired by the defendants for ulterior purposes was quite apparent."

Not only apparent but inescapable. Any defendant appealing in good faith to have his case favorably passed upon would exhaust every resource of courtesy and respect to gain a friendly ear. The Townleyites not only treated the court of Judge Dean with utmost implied contempt during the trial but in appealing for a retrial their procedure was nothing but a studied insult. Instead of bringing the motion before the judge in the usual way for argument and presenting briefs with citations of cases to permit the court to pass immediately upon the points at issue, they merely caused to be handed to the court a document of 1,186 typewritten pages from which he might decide the merits of the motion with the prospect of being reversed by the supreme court if error were made in the ruling.

Their purpose evidently was to appeal to the supreme court in any case, but to make the procedure as difficult as possible for Judge Dean and, if possible, to bring about his humiliation if he were not industrious enough to digest the contents of the 1,186-page document. Of the boorishness and backhandedness of such conduct little need be said except, perhaps, that it somehow bears the flavor of limburger and onions.—St. Paul Dispatch.

The Profiteers Don't Want Any Change

ELLENDALE EDITOR ADVOCATES NEWS BY RADIO FOR N. D. PAPERS

H. J. Goddard, of the Dickey County Leader, Tells Association of His Plan.

(Special to The Tribune) Fargo, N. D., Aug. 6.—H. J. Goddard, editor of the Dickey County Leader, one of the state's leading weekly newspapers, was to speak before the North Dakota Press Association here today on "Getting News by Radio," but labor shortage prevented him from attending the meeting.

A copy of his address on the subject of wireless news reports was read before the convention. A portion of Mr. Goddard's talk follows: "The idea of getting news by radio was really given to me by President Fokker, when he suggested that I read a paper on getting news by airship. Probably in a spirit of fun, he suggested that I should broadcast state news, after the plan employed by the big government stations, is receiving some attention from Mr. Russell H. Pray, Dakota manager of the American Radio Relay League, whose efficient station at Valley City is known all over the country. This plan may be employed during the coming winter.

"My plan goes a step further, and contemplates, some time in the future, a radio station in every county, which can be used by members of the North Dakota Press Association in receiving and transmitting state news. The value of this system in handling election bulletins and other important matters needs no comment. It can be done very easily if the members of the association or organization I have not considered except in a hazy manner. Certain it is, however, that the apparatus can be easily, and not too expensively obtained; the big need is the organization. Radio is just coming into vogue, and the great need is that to get an efficient system working before other like organizations even think of it.

Play—Not Work "Aside from its utilitarian value, no better means of supplying that relaxation so necessary to the busy man can be found. Sitting at a good radio set and listening to the air traffic of the world lifts a man out of his little orbit and gives him a feeling of power that can be gained in no other way. The news of the world is his to take, fully twenty-four hours earlier than he can get it in his morning paper; and the get-

ting of this news affords an enjoyment that will leave him fresher for the morning's routine. And while the big feature of my plan is the purely practical matter of quickly handling state news, this by-product, if you please, the "play-time" feature, plus the closer knitting together of the members of the press association sure to follow, might well be worth the trouble and expense of setting up the apparatus. A standing invitation is extended to the press gang to visit my station at Ellendale if you will only "listen in" once, the old Sunday morning joy of fixing up the flivver will be gone forever."

HEALTH ADVICE

BY UNCLE SAM, M. D.

Health Questions Will Be Answered if Sent to Information Bureau, U. S. Public Health Service, Washington, D. C.

Fainting.

Fainting is a condition of suspended animation associated with a great diminution of blood in the brain and unconsciousness caused by sudden enforcement of the heart's action. Fainting may be the result of disease of the heart, hemorrhage, pain, excessive emotion, tight lacing, indigestion, hunger, exhaustion, hot and vitiated air, and many other causes. Before the stage of unconsciousness is reached, the person affected experiences a weak and sinking feeling with dizziness, dimness of vision and roaring in the ears. The face and extremities become cold and clammy. The stage of unconsciousness may last a few seconds or an hour or more, depending upon the cause. During this period, the pulse is weak and almost lost, and the respiration

is very shallow or may apparently cease. Fainting is of very common occurrence and is usually not associated with danger.

Treatment—The patient should be placed in a recumbent position with the head as low or lower than the body to favor the flow of blood towards the brain. Fresh air is a very essential element in the treatment of fainting. All tight clothing, such as collars, corsets, skirts or trousers, should at once be loosened in the ordinary forms of fainting due to simple causes, this treatment is all that is required, for nature very soon asserts herself. In other cases, smelling salts, or a handkerchief, or the palm of the hand moistened with ammonia, or other stimulant may be held near the face, care being taken that none drops in the eyes and that it is not held too close to the face, as it may cause violent irritation of the air passages. The head and face may also be bathed with an alcohol solution, such as camphor, bay rum, etc.

Friction can also be supplied in the limbs. Dashing water in the face and other rough methods are to be deprecated, for it must be remembered that, as a rule, nature is fully able to deal with this situation. Little aid is required beyond placing the person affected in a proper position with free air and the release from tight clothing.

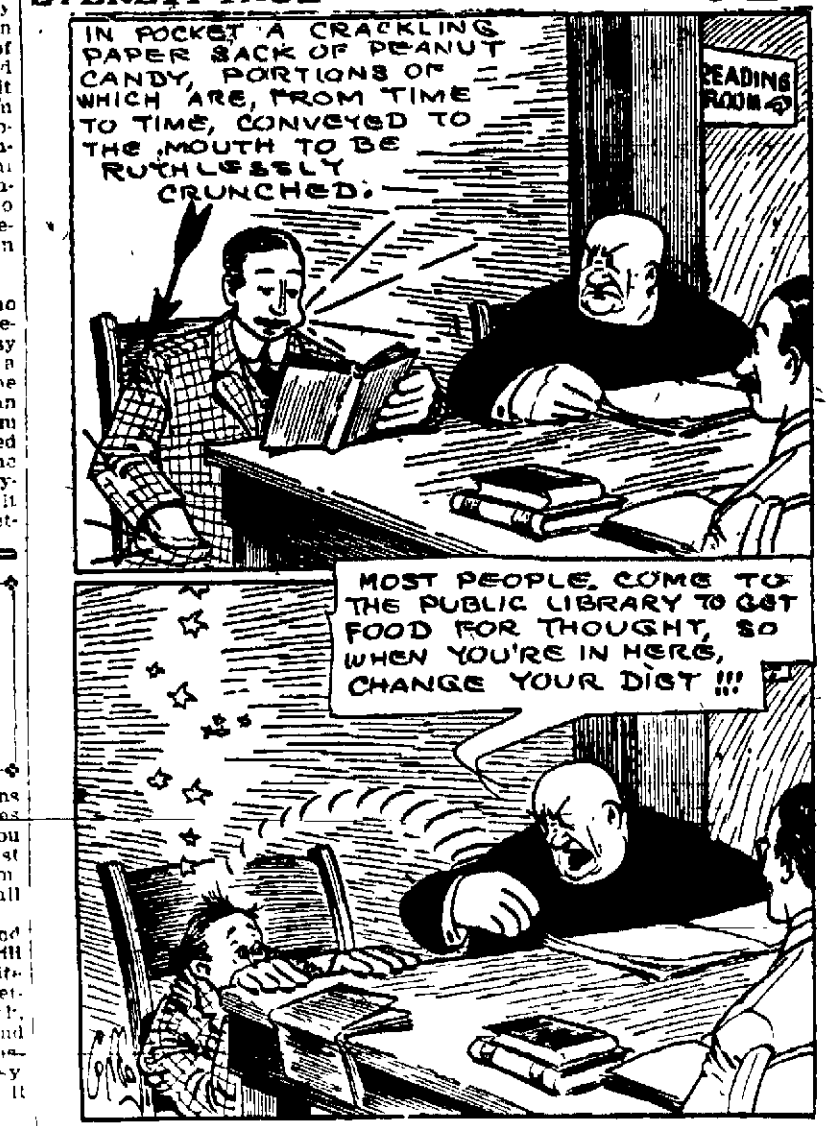

ANSWERED.

Q Where can blood tests be taken?
A Blood tests can be made at any good hospital or at any of the venereal disease clinics in your state.
Q How long does it take to tell from a blood test if you have syphilis?
A As soon as the blood test is completed, it is possible for the physician to tell instantly whether it is positive or negative.

An eggbeater has been invented to be driven by water from a faucet.

EVERETT TRUE

By Condo

BE A SPORT.

You may call yourself dull in a fit of despair. Or drop all your pep, and may you don't cure. But I'll tell you, my friend, that's a habit to break. n planning this world not a single mistake was made in the building. So when you complain Take stock of yourself. You're the chap just right about face; it may hurt some. It's true. But that's just the way any good sport would do.

When you wake in the morning don't look for a cloud; You know what's behind it. Just swing in the crowd. Be one of them cheerfully singing along You may get a bump, but don't stop your song. Perhaps one will hear it who needs just a bit Of encouragement now. Your song may be it.

What matter if yesterday's failure were a big? Today is your day, so get in and dig. If you meet any trouble, why just change its name. And call it a ladder. They oft lead to fame. But whatever you do, be quick and begin it; You never can tell just how much there is in it. —Jane Bates, in Forbes' Magazine.

AND THE EDITOR PONDERED

Possibly Unfortunate Man Had Also Done a Little Wondering Along That Line.

"Daddy," piped the little darling, "is it true the sea is a mile deep?"
Daddy, who was also an editor, glanced up irritably from a huge pile of manuscripts. "I don't know," he snapped.
The little darling looked disappointed. A little later he asked: "Is the moon really made of cheese, daddy?"
Again came the response: "I don't know!"

Another look of disappointment, another silence, and another question: "Do cannibals use postage stamps?"
No less savage than the cannibals themselves was the distracted manuscripter for the third time: "I don't know!"
"Well, say, daddy," exclaimed the youthful inquirer, very seriously, "who made you an editor?"

Sixty-Pound Piano.

A piano weighing only 60 pounds may not compare favorably in looks with a baby grand, but it has other advantages. It is smaller and is able to tuck it away in their equipment, and it helps to while away many hours. The piano has a regular five-octave range, but tuning forks instead of strings are used to produce sound. This does away with necessity of tuning the instrument. When a key is struck a hammer drops on a tuning fork, setting it in vibration and producing a sound. The fork is connected by a spring to a sounding board which reinforces the sound. The piano is also equipped with a loud pedal. A damper that rests on the end of one arm of the fork may be raised, when the fork is free to vibrate loud and long.

Rapid Wireless Transmission.

Recent long-range telegraphy experiments which have been made between Great Britain and the occupied part of Germany, indicate that in a short time it may be possible to transmit messages at the rate of 150 words per minute. It is stated that experiments in wireless telegraphy by officers employed at the signals experimental establishment at Woolwich have succeeded in transmitting messages over considerable distances at the speed of 100 words a minute and that very much greater speeds have been proved to be attainable.

Figures on Channel Tunnel.
In order to expedite a decision respecting the construction of a tunnel under the English channel, a deputation of the channel tunnel committee of the house of commons recently called upon the prime minister. His attention was called to the fact that no serious engineering difficulties were anticipated; that the time necessary for completion would be five years, and the total cost would be \$153,728,000, or double the pre-war estimate. There was said to be great enthusiasm for the scheme in France.

May Wipe Out the Coyote.
The demand for the skins may be the means of wiping out the coyote which has been the nuisance of the western lands for years. There are great numbers of these animals frequenting the vicinity of Mount Whitney and hunting and trapping are being pursued there with such vigor that the pesty animals are threatened with extermination.

A burning oil well near Taft, Okla., consumed 180,000,000 cubic feet of gas every 24 hours.
Bodies were mummified in Egypt by the saturation of an impure carbonate of soda obtained from certain lakes.

HELP WANTED—MALE
COAL MINERS WANTED—By Benish Coal Mining Co. at Benish, N. D. Steady work. Apply at mine or at Benish office in Haggart Building. 7-24-17

WANTED—Young man, married, preferred who wants to increase his monthly income. One or two hours a day work, must be able to go to Madison three times a week. Good proposition to right man. Call Friday evening, Room 418 McKenney Hotel. 8-4-17

WANTED—A general blacksmith at once. Write to Fritz Schnitzer, Benish, N. D. 8-4-17

HELP WANTED—FEMALE
WANTED—Experienced mining room girls. Good wages. Good place to work. Phone 209. Write, Anna Cafe, Benish, N. D. 8-3-17

WANTED—Girl to work for board and room. Call 621 6th street or phone 619R. 8-4-17

WANTED—An elderly lady at once. Barker Bakery. 8-4-17

WANTED—Waitress at Homan's Cafe, Fourth St. 7-25-17

SALESMAN
STOCK SALESMEN—The biggest and best selling proposition in the North-west is open today. This is a big concern with a strong local board of directors with over five hundred stockholders. Highest commissions paid, with splendid leads and co-operation. Address, Financial Mgr., Box 281, Fargo, N. D. 8-4-17

ROOMS FOR RENT
FOR RENT—Rooms at 840 9th St. Phone 377K. 8-4-17

ROOM in modern home, 1 gentleman preferred. Phone 322K. 306 8th St. 8-5-17

FOR RENT—Room in modern home, 311 2nd St. or phone 842L. 8-5-17

FOR SALE OR RENT HOUSES AND FLATS
FOR SALE—Seven-room modern house, east front, well located, on very reasonable terms; 6-room modern house, well located, for \$3,200, on terms; 6-room modern house, well located, for \$3,250; nice house, chicken house, well and 5 acres of land for \$3,000, on terms. Geo. M. Register. 8-4-17

FOR RENT—Modern 10-room house, corner Main and Mandan. Phone 643L. 8-4-17

LAND
FOR SALE—160 acres of land, 100 acres under cultivation, located four miles north of Flasher, N. D., or will consider a trade of Mandan or Bismarck town property. Write to Harrison Brooks, General Delivery, Bismarck, N. D. 8-3-17

FOR SALE OR TRADE—For land, store and stock of general merchandise. Write to Schmidt, Schmidt, N. D. 7-25-17

LOST AND FOUND
LOST—July 28, Brown and white pointer dog, Mause Rex. Notify A. L. Swanson, Wilton, N. D., for reward. 8-4-17

LOST—A ladies gold watch. I engraved on back. Reward Mrs. S. F. LAMBERT. Phone 407PL. 8-4-17

MISCELLANEOUS
FOR SALE—One Advance 22 in. B. Steam traction engine. One Advance 12-hp. Separator. Complete with wood chopper, weigher, belts and 12-hp. motor attachment. One Advance 12-hp. wood water tank. One half round 12-barrel wood water tank. One set of eight bottom engine. Doves engine. One Avery Separator. 32x54. One 32-inch Bartholomew Band cutter and Feeder. One J. H. Farmer's Friend. One Weigher. One Hatley attached Stacker. One Avery Gas Tractor. 25 H. P. One Brock power. One Avery 15-hp. mounted Gas tank. One Canvax Drive belt. Apply to Regan Stationery, Bismarck, N. D. 7-29-17

FOR SALE—50 lb. cashing machines. Some as good as new, going at a bargain. Size 22 in. to 40 cylinder. all makes. Hazelton Second Hand Machinery Co., Hazelton, N. D. 8-4-17

FOR SALE—Furniture, parlor, dining and bedroom sets, also kitchen. Phone 688K or call Ave. A and 21st Street. 8-4-17

FOR RENT—Katz barn, can be used as garage or storage, will rent for any length of time. Call Katz barn. 8-4-17

FOR SALE—Furniture, heating and electrical building, established 12 years. Can reduce stock to suit. Box 91, Enderlin, N. D. 8-4-17

FOR SALE—Home, good early neighborhood. Call if interested. Write Mr. Rhodes, 111 W. 1st, Bismarck, N. D. 8-4-17

WANTED TO BUY—Second hand furniture and stoves. Call at 707 Sweet St. Phone 888L. 8-4-17

WANTED TO BUY—Second hand electric range in good condition. Write No. 126 Tribune. 8-4-17

WANTED TO BUY—Four burner gas stove with oven. Call No. 108 Tribune. 8-4-17

SOME ONE to put up 1-2 box of hay on shares. Call 406 RZ. 8-4-17

FOR SALE—Cow. Write 125, care Tribune. 8-4-17

QUEER JUMBLING OF RACES

Caucasian Religion Has Been Appropriately Designated as the "Mountain of Languages."

With various anti-bolshevik governments seeking a resting place and capital at one end of the range and fabulous oil herds of Bakou at the other, inspiring covetous imperialistic interest, the long line of mountains which separates Europe from Asia gives promise of once more attaining the headline position it so often has held throughout the ages. Made up of 400 miles of majestic peaks, in three ridges, the Caucasus stretches from northwest to southeast like a petrified wave, whose northeastern face mounts to the snow crest, but whose southwestern front facing toward Turkey, seems dashed into countless precipices by the titanic forces of nature, says a bulletin from the National Geographic Society.

The Caucasus is the most interesting rabbit warren of humanity on the globe. For uncounted ages various peoples sifted through the selected valleys, leaving a fraction of their number in some remote spot, so that at one time it was said that there were 800 tribes and dialects in the region. 850 miles long and 300 miles broad, which he carried the "Mountain of Languages."

Tribune Want Ads Bring Results

Tom: I have some news for you tonight. You know we haven't made much headway with our vacation plans so I let Danny go away on his own. Mrs. Dresser has invited five little boys to spend two weeks on their farm. It's more of a country home. She has two "maids to look after the kiddies."

Well, that's fine for him! For him? Well, like that!

Why I don't expect to go any place. I don't care so much as long as the youngsters have a good time.

I have it! You and I will take a vacation trip alone. Just the two of us! All by ourselves!

Just you and me together! We'll take our second honeymoon!

ONE SUMMER NIGHT

"I do not think it is fair," said the Maple. "We wear green all summer, and look at the gay clothes our cousins, the flowers, wear!"

"I have looked at them often and often," said the Chestnut tree, spreading out her branches to better see into the garden below.

The Oak tree said she, too, had often longed for a change of dress—something dark and rich," she said. "I would choose if I could have a new one."

"And why should we not have new ones?" asked a pretty Beech tree. "I feel sure that some one could help us to get them if we only asked."

"But of whom could we ask such a favor?" said the Maple. "No one but the fairies could bring about such a change, but if I could change my dress, I would not care for a plain dress. I should choose gold and red."

The Maple rustled as she spoke, as if she were already dressed in her fine new clothes.

"Oh, I would choose to be dressed like my cousin Matigold in the garden," said the Chestnut tree. "I have always admired her color."

"I quite agree with your choice, my dear," said the Beech tree. "Only I

would choose the shade like the tall Sunflower which looks over the garden wall."

"But all this choosing of colors for our gowns does not get them," said the Maple, "and it seems to me that our sister Oak can help us, for does she not furnish for the fairies and the goblins their cups? Everyone knows that acorns are fairy and goblin dishes."

The sturdy Oak began to move. "I never thought of that," she said. "I'll ask this very night."

And she did, but the fairies told her they could do very little besides getting the goblins to listen to their request for Jack Frost kept all the fall, shades up in his house in the North.

"You see," said the fairies, "you could not put on those gay colors when the flowers are in bloom because the green is needed to make the world beautiful, but we are sure that later in the season you could have your wish."

The goblins listened to the trees and promised to see Jack Frost, as soon as he was awake, and when the flowers went to sleep that season the trees were given their new clothes and there they stood all gay and beautiful like a huge bouquet, and every year since that time they have changed their dresses as soon as the flowers went to sleep.

"And to think that we were those green clothes all that time," said the Maple, "when for the asking we were given these beautiful clothes—the very latest autumn colors!"

But so proud were these trees in their new gowns that they rustled and shook themselves until all their gay leaves fell off, and though every year they think they will be more careful, their pride is so great they cannot stand still and when winter days come they are without a leaf to cover them. FRECKLES AND HIS FRIENDS

I bet my pop is somethin' your pop ain't, s'wag's betcha.

Aw, yer always braggin' about yer pop—what is he anyhow?

Why, he's a blk—yes, a blk, ain't he tag?

Yeah.

Aw, what do I care—that ain't sa'uch.

Ain't s'aruch to be a blk? Well—I guess it is, an' yer pop ain't one either.

S'wag's that ain't nuthin'—ya know what my pop is?

He's a night hawk—I heard my maw say so!

Examination to Be Held in August to Fill Classes Normally Full in June.

SOME CAUSES OF VACANCIES

Reaction Against Militarism and High Salaries of Civil Life Among Those Cited—Some Congressmen Are Lax.

Washington—Have the seven seas lost their lure? Do the ghosts of John Paul Jones, Farragut and Perry, and others of like fame, no longer beckon adventurous and ambitious American youths to clear the decks of the nation's ships for action?

There are approximately 400 vacancies on the rolls of the United States Naval academy at Annapolis. Another examination must be held in August to fill up the classes that should have been filled by June. Apparently young men no longer scramble for the privilege of becoming the admirals of tomorrow.

Yet navy officials believe this is only a temporary condition. The sea and Uncle Sam's "navy," they are confident, have not lost permanently their appeal to the spirit of the young men of America. The opportunities in the service are greater than ever.

Many Attractions.
Submarines that crawl near the bottom of the sea; hydroplanes and "blimps" that soar above; destroyers that churn the surface of the ocean; battle cruisers of wondrous speed and majestic bulk; electrically driven submarines; and quickly reached ports of call where the daring deeds of history have been written—all these are offered today to the young man who would enter Annapolis and become a part of the sea forces of this republic.

Therefore, though there may be 400 vacancies at the naval academy, the navy department at Washington is only temporarily concerned and has faith in the maximum enrollment. Perhaps the American youth needs only a reminder of what he may become.

Three principal reasons are ascribed here for the vacancies at the academy. They are:

A natural reaction following the ending of the war, and a national subconsciousness which draws every one away from things military.

The high salaries and wages received by young men in industry, making years of study and the comparatively modest emoluments of a naval career for the time unattractive.

Tardiness of members of congress in making appointments which are accredited under the law to every member of the senate and the house.

There are doubtless other reasons which may be later discussed, but the three headings enumerated probably furnish almost full explanation of the necessity for additional entrance examinations. In all likelihood the high cost of living has had its effect on academy entrances just as it has on every other line of endeavor.

Interior States Short.
An analysis of the vacancy list shows that the interior states have the greatest number of appointments yet to be made. Evidently the youth far removed from shores against which the wild waves beat is contented with his job on the farm, in the office or in the workshop. Either that or the number of congressmen who are privileged to make appointments for entrance examinations has not diligently surveyed his district for eligibles or presented to his constituents the advantages of a naval career.

The list of vacancies for midshipmen for 1920 which is available at the navy department reveals that there are 282 vacancies which senators and representatives are entitled to fill by appointment. In addition the navy department itself has approximately 20 vacancies to fill from the enlisted ranks. Previous examinations have made eligible for admission to the academy some 80 of the 100 candidates allotted to the department proper. The department expects to complete its roster at the forthcoming extra examination.

Desert Made Habitable.
In the southwest corner of France, between the rivers Adour and Garonne, are long stretches of pine woods, green and cool. Where these pine now stand was a barren waste in the middle of the eighteenth century. Sun and wind vied with each other in making the land drier and dustier. Over the stormy Bay and Biscay came winds that set up great sand storms and sometimes buried whole villages.

But at last there came along a man who acknowledged fate only as something to be overcome. His name was Bremont and he was an inspector of roads.

He began fencing in the desert. He built a fence and behind it planted a handful of broom seeds. Behind the broom seeds he put seeds of the pine. The fence protected the broom seeds and the broom grew. Then the broom in its turn afforded shelter to the delicate pine shoots.

Soon the pines spread and their tough roots bound the sandy soil together. The first step was accomplished. Then canals were made to drain the wet parts and carry water to the dry. New York Evening Post.

Walnut Stump Worth \$250.
A single walnut tree stump, grubbed out on the banks of Clark's creek, will net the Sellgatt brothers, Geary county farmers, more than \$250, according to a Junction City (Kan.) dispatch.

The brothers recently purchased all of the walnut trees and have been cutting them down and shipping the timber to St. Louis and Kansas City markets, where it commands high prices.

The big stump weighs more than nine tons and the portion above ground measures fifty inches across, while the portion that was underground was even larger. It is estimated that the huge chunk of timber would make gunstocks enough for an entire regiment.

Based on present prices, the tree of which this stump formed the base will bring in more than \$250.

BOOZE LIST MADE LONGER

Blackberry Cordial and Wild Cherry Wine Put Under Ban by Authorities.

Washington—Blackberry cordial and wild cherry wine were added by the bureau of internal revenue to the list of intoxicating liquors, and may be sold by druggists in retail quantities of less than five gallons only to persons who have obtained permits to purchase intoxicating liquor.

Instructions were issued to federal prohibition directors detailing several preparations containing alcohol that are held to be fit for beverage purposes and are therefore regarded as intoxicating and subject to the prohibition regulations.

Elaborate liquors came under the ban with the olive oil and bitter orange. Compound spirits of juniper and myrrin were ruled intoxicating, as well as compound tincture of lavender and several other pharmaceutical preparations.

MACHINE TO DETECT LYING

Scientists Find Breathing and Blood Pressure More Rapid During Prevarication.

Columbus, O.—Science is working on a machine which will tell whether you are lying or not. Prof. H. E. Burr, instructor in psychology department of the Ohio State university, is perfecting the apparatus and registering his data to establish this possibility.

The subject under observation has his blood pressure and his inhaling and exhaling registered. Burr is trying to determine the exact ratio between inhaling and exhaling when the subject is lying.

The breathing and blood pressure of the person is more rapid when he is prevaricating, Professor Burr says.

Good News for the Landlord.
Ashland, Ky.—Finally with a tenancy flicks it's end news for the landlord, but when Dr. A. V. Adkins received the following letter he felt otherwise.

"Dear sir: I want you to come here at once and see what is the matter with your gas well. We do not get enough gas to cook with and when we turn it on it runs all over the kitchen. Could you send us a man to do it? It is a gas stove only."

Women to Establish and Run Factory.
The establishment of a match factory at Canton, Ohio, is planned by progressive women of the city, who have issued a prospectus in an effort to raise \$10,000 for the purpose. The women will operate the plant, doing all necessary work.

Light striking the metal spiral turns a mild electric current within it.
Oxygen and carbon if mixed under proper conditions make an exceedingly powerful explosive.

Moscow Made to Appear Busy to Deceive the English Visitors.

An attempt to make Moscow look a busy and prosperous city during the visit to that city of the English labor delegates is told by the British information bureau, whose press bureau at Riga has a special correspondent attached to the peace delegation in Moscow.

"The various institutions in soviet Russia had for a long time been busy in making preparations for the reception of the English labor delegates in order to show them Russia in attractive colors," says the correspondent.

In Petrograd where, as a rule, almost no people are seen in the streets, all the officials were ordered to take part in the reception. Theatrical representations and grandiose banquets were organized with the participation of actresses from the Mariinski and Alexandrovski theaters. The delegates were taken to Moscow in a special train, accompanied by Tcherkes soldiers in bright uniforms.

In Moscow, the day before the arrival of the English delegates, all the papers published strict orders issued by the military and civil commissaries setting out what everybody had to do and how to behave. On May 17 the tramway service in the city was suspended, all the cars being taken to the neighborhood of the Nikolaevsk station, where, gayly decorated, they moved to and fro, trying to convey to the visitors the idea of busy traffic.

In the station all the motor cars from Moscow were mobilized, even the highest commissaries having to walk. On May 18 a parade was organized, but no private persons were allowed to be present. This is the way the bolsheviks organized the tragedy-comedy of the communistic paradise in order to deceive the English visitors as to the real state of soviet Russia.

WOULD SEND STEEL ROCKET TO MOON

The moon is the latest field selected for the planting of American rockets. This time Professor Goddard comes to the fore with a steel instrument (which he is shown holding in his hand) capable of traveling at an average speed of 8,000 feet a second in exploding gas. With a rocket of this kind the professor believes he will have little difficulty in landing a message on the moon.

FRENCH FIND HUGO GRAFT

Buyers of Army Supplies Discover Cases Full of Baby Clothing.

Amazing revelations of graft, amounting into millions of dollars, in supplies shipped to the American forces overseas during the war have just been made in taking an inventory on goods bought by the French from the United States.

A full mill of cases marked "bottles of ink" or "canned food" were found to be crisscrossed with the top layer of each containing a mass of food or bottles of ink. The rest of the cases were empty.

More than 500 cases of baby clothing were found, and the French are wondering how it got there. A few cases were found to be crisscrossed with the top layer of each containing a mass of food or bottles of ink. The rest of the cases were empty.

It is estimated that it will take more than five years to sell the stocks piled up at the Gisors depot alone. Meanwhile, due to the inefficiency of staffs to handle the stocks, millions of dollars' worth of supplies are rotting and spoiling.

EVENTS AND GOSSIP FOR THE FANS

VALLEY CITY WINS FIRST GAME MARKED BY SPECTACULAR PLAY

Game Hardfought Throughout, Valley Team Getting Long End, 4 to 1—Christensen on the Mound for Bismarck, Opposing Boardman—Game Declared Best of the Season by Fans

TEAMS PLAY AGAIN TODAY

Christ. Dolly Elder, of the local club, sustained a broken rib in the first inning of the Valley City game. An X-ray examination was to be made today to determine the extent of the injury. Elder is out of the game as a result of the injury, and the local line-up will be shifted.

The best game of the season. That's the verdict of the fans who saw the Valley City game last night. The real ball game of the season was played in the first class exhibition. And the real ball game was played in the first class exhibition. And the real ball game was played in the first class exhibition.

Christensen was the star pitcher for Bismarck. He was welcomed by the fans who remember his pitching of three years ago. Christy has been pitching for Bismarck, and yesterday's game was the first he has lost this season. His pitched good ball. At Anderson was slated to pitch for Bismarck today, and Valley City had Walker, Angell and Adams to draw from.

One in Fifth. The local one run game in the fifth. Needham went to first when the third strike went to the grandstand. He went to second on Seibert's infield out and scored. Dolly Elder's ringing double to right.

Boardman hurried for Valley City. He had fourteen strike-outs, and held Bismarck to five hits, of which only two were runs. The game was a hard fought one. Bismarck's only error was credited to Elder, an excusable error on a hard hit ball. Elder was badly hurt in the early part of the game in making a dive to tag Goheen at second, but continued to play throughout the game.

Brown robbed Roberts of a hit by a shoe-string catch in center. Conroy robbed Goheen of a hit by a shoe-string catch in center. Conroy robbed Goheen of a hit by a shoe-string catch in center. Conroy robbed Goheen of a hit by a shoe-string catch in center.

First Inning. Valley City struck out, Chicken to Franky. Seibert out, Chicken to Franky. Seibert out, Chicken to Franky. Seibert out, Chicken to Franky.

Second Inning. Valley City struck out, Chicken to Franky. Seibert out, Chicken to Franky. Seibert out, Chicken to Franky. Seibert out, Chicken to Franky.

Third Inning. Valley City struck out, Chicken to Franky. Seibert out, Chicken to Franky. Seibert out, Chicken to Franky. Seibert out, Chicken to Franky.

COUNTRY CLUB'S GOLF HANDICAP PLANS ARE MADE

Both Men and Women Will Participate in Play for Championship

Entries for the annual golf handicap and club championship of the Country Club will be received up to and including August 15. It was announced today by the tournament committee.

Up to and including Sunday August 15, will be allowed for turning in 26 holes qualifying scores for both tournaments. Same cards will be used for both. Cards must be marked "tournament" and deposited in the boxes.

Matches will be arranged by committee and match play start at once, after August 15.

Dates for the completion of each frame will be assigned by the committee, and matches not completed by date specified will be defaulted. This rule will be strictly enforced, because in years past it has been so difficult to get the matches concluded, that the finale have to be played too late in the fall when there is likelihood of stormy and cold weather.

WILTON PAPER TALKS OF GAME

The Wilton club is out to win again from Bismarck in the return game Sunday. The game last Sunday was won by Wilton because of Cunningham's great pitching and because the local club was outplayed by Wilton at every stage of the game, according to Wilton News, which adds:

Chas. Tauer of Underwood and Posely of McCluskey officiated as arbiters, and gave eminent satisfaction. According to the game on Sunday, the game was won by Wilton because of Cunningham's great pitching and because the local club was outplayed by Wilton at every stage of the game, according to Wilton News, which adds:

THREATENS TO MOVE BALL CLUB

Louisville, Aug. 6.—The Louisville baseball club's franchise in the American association is in danger of being transferred to Dayton, Ohio, unless the fans respond with the patronage. According to an announcement by President W. F. Kuebelkamp, with this announcement came an admission from Kuebelkamp that he owns only one-sixth interest in the club, the remainder being the property of Ohio and J. B. Wathen, from whom he was supposed to have purchased it last year.

Kuebelkamp said he made no money with the team last year and this season he is doing worse than ever. He also ventured the assertion that the Wathens failed to lay up anything in the seven years that they ran it in their name, and that in closed one season when Louisville won the pennant.

IS BABY SICK? NATIVE "DOCTOR" ASKS THE CHICKEN ABOUT IT

There's a case where the chicken's gall and not the pulse determine a patient's illness. In the Philippine Islands this treatment among the natives is common. The picture shows a native doctor finding out whether the baby is sick—from a chicken! He kills the chicken which he has given the child's name, and the gall's color determines—so far as he is concerned—the illness and the cure!

It was a tight pitching duel between Barnes and Vaughn. St. Louis, Aug. 6.—Watson held St. Louis to four hits and Boston defeated St. Louis, 1 to 0.

TELLS EDITORS THEY MUST NOT SHIRK DUTIES
(Continued from Page One)

Help for Beginners. "Every machine in our plants must be at the disposal of the young fellows who show an inclination to master them, if in the future we are not to witness the supplanting of the printing art by craftsmen who have had greater vision than we."

As a means of solving the printing situation, he urged the publishers to pool their interests and make up a regulation list for the coming year, sign an agreement to pay spot cash for shipments, and then place an order for a year's tonnage with some mill at contract price. The organization of a ladies' auxiliary was recommended by the president.

Bill's Invitation.
Mr. Forsman referred to the correspondence he has taken care of as president of the association.

My biographer, properly fumigated, has been dispensed freely to the trade journals as fillers, and at all times I have had the recognition that was due me as the representative of this dignified body of men, even to the extent of having a letter addressed to me as "Honorable" by Mr. William Leake, inviting me to join him on a little jaunt to Marion, Ohio for the purpose of tipping it out to better Harding than he was nominated for the presidency.

Mr. Harrington's Address.
P. O. Harrington, adjutant of the Lloyd Spurz Post, American Legion, Bismarck, addressed the editors on 100 percent Americanism as represented in the program of the American Legion.

AMERICAN ASSOCIATION
Toledo, Aug. 6.—Chicago yesterday showed effects of the strenuous series played yesterday in the opening game of the Yankee-Tiger series, which Detroit won 7 to 1.

Another Sleepless Night?

It's been a busy and fretful day. Brain fagged, nerves frayed and body exhausted—conspicuous that tomorrow is fraught with new trials and tribulations, he realizes the imperative need of a refreshing night's rest. Yet, he hesitates and dreads to go to bed lest he roll and toss throughout the night.

Lyko
The Great General Tonic

The hour of bed-time will soon lose its terrors and you will be able to rest your couch with pleasure and anticipation of a night free from disturbances. "LYKO" will bring you with sweet, sound and peaceful slumber and bring you down to breakfast table in the morning in good spirits and in fighting trim, keen for the day's activities; rested and refreshed in body and mind, and with an appetite unquenched since you were a boy.

LYKO is a scientific general tonic, reliable appetizer and an excellent stimulant to the nervous system. It relieves brain lag and physical exhaustion; builds up the weakened muscles; corrects digestive disorders and rehabilitates generally the weak, irritable and worn-out. Ask your druggist for a bottle today and get rid of sleepless nights.

entire program, he said, is designed to:

- Combat all anti-American tendencies, activities and propaganda.
- Work for the education of immigrants, prospective American citizens and alien residents in the principles of Americanism.
- Spread throughout the people of the nation information as to the real nature and principles of the American government.
- Prevent the teaching of Americanism in the schools.
- Combat the circulation of radical literature through traveling libraries whose object is the abuse of children's minds in the principles of our institutions and the schooling of their thought to socialistic ideas.

"Pending the enactment of legislation to cover the program adopted, an immediate program for the wiping out of Bolshevism in all its insidious forms was put up to the local posts, such as detecting all and sundry activities and seizing every opportunity to speak plainly for 100 percent Americanism and nothing less."

It is the intention of the legion to make every member of every local post a constructive force in the upbuilding of vital knowledge of the principles of the constitution of the United States and of the processes of law and order obtaining under that constitution.

The further program of the legion, he said, demands the deportation of those who renounced declarations of intentions to become citizens in order to avoid military service, deportation of aliens convicted under espionage law, and of immigration laws with examination of immigrants, admission of immigrants on probation, during which period of probation they will be given an opportunity to learn to read and write our language and become familiar with our institutions.

At the end of that time if they are found to be unable to assimilate our institutions or show opposition to our form of government then they would be returned to their native land," he said.

The war department's policy of leniency toward conscientious objectors was condemned, unions of Russian Workers of the United States were condemned, and the Industrial Workers of the World.

He spoke of the activities of Har-
